**Introduction to the Service Provider Handbook**

I am pleased to introduce the “Service Provider Handbook” developed by ACTED and NEICORD as part of their project “Improving Access to Information and Delivery of Public Schemes in Remote and Backward Districts of North East India”.

Over the years, the Government of India has been serving and extending support to the people of North East India through various Public Schemes. However, the people especially those in remote areas and villages have very limited knowledge about such Public Schemes. They are unaware of their entitlements under the schemes eligibility and the process to access them. A handbook such as this, which contains all relevant information about the 10 selected Public Schemes will help to increase the level of awareness among citizens and communities. In turn, this will also help to reduce the gap between ‘Service Providers’ and the ‘Service Users’. Eventually, the Government will be able to serve the people better and provide services more effectively for the welfare and development.

This Handbook will be useful not only to the staff of the Project and relevant officials of government departments, but also others such as CSOs, NGOs, CBOs and SHGs in the region. I am sure the Handbook will help the people, for whom the public schemes are intended for, to know more and benefit from the schemes.

(L. Baite. IFS)  
Managing Director

## Foreword from ACTED

This service provider handbook has been developed as part of one activity of ACTED's project on "Improving Access to Information and Delivery of Service Schemes in Remote and Backward District of North East India" funded by the European Union. It is the first published handbook of its kind and is part of many other activities under the current project to increase awareness and information on public schemes among community members.

The handbook contains relevant information on the 10 selected Central Sponsored Schemes covered by the project as well as information on "Right to Information (RTI)" and Aadhaar. You will find as well details of the schemes and entitlements, eligibility criteria, procedure to access entitlements and also the contact details/addresses of the concern department responsible for rolling out the schemes in all the 7 districts covered, as well as information on grievance redressal mechanisms.

Five copies have been printed for each of the 200 targeted GPs and kept local either in GP offices, SHGs or with citizen volunteers. The handbook is available in English and four local languages: Assamese, Bengali, Khasi and Mizo.

We encourage Gram Panchayat/Village Council offices, SHG groups, NGOs/CBOs and Citizen Volunteers to use the handbook as a tool which will let community members to approach directly the concerned departments for service provision.

In that sense, we hope that this handbook will contribute to bridge the key information gap amongst service providers and users/beneficiaries, and make an impact on beneficiaries' life as to their full entitlements in the 7 districts covered by the project.

Cyril Pouloupoulos  
Country Representative, ACTED India

## Fore word from NEICORD

‘Improving Access to Information and Delivery of Public Schemes in Remote and Backward Districts of North East India’ is a project being implemented in seven districts of five states of North East India. This “Service Providers Handbook” has been developed under this Project as a compilation of information about the ten schemes covered by the Project, in particular about entitlements, eligibility criteria, application processes therein, and RTI and Aadhaar.

This Handbook is intended for use by various stakeholders - the citizen for whom these schemes are intended, service providers, local civil society organizations, non-governmental organizations, village councils and panchayats. Staff and volunteers of the Project will use this in their campaigns and other activities to bridge gaps in information towards better services provided and used.

Access to correct and complete information is one of the more critical components in improving the quality and coverage of public service provision and utilization in our country. I hope that this Handbook fulfils this need.

Sundar Daniel  
Executive Director, NEICORD
